W. S. BENEDICT, Grower
General Information

Kindly send me your order as soon as possible and avoid disappointment, as some varieties are limited. If possible, name second choice as I do not substitute unless advised to do so and then only with varieties of equal or greater value.

Bulbs will be shipped as soon after April 15 as weather and dividing the clumps will permit. They should not be planted before the middle of May; from the first to the middle of June is better.

I guarantee every bulb sent out to be true to name and to grow when shipped, but cannot be held accountable, if bulbs are kept in a dry place too long before planting. As soon as received, they should be covered with moist earth and allowed to start before planting. Will replace bulbs the following year that do not prove true to name.

Dahlias should be planted about three and one-half feet apart each way. Dig the hole about one foot deep and mix a small amount of fertilizer with dirt in the bottom of the hole to within six inches of the top. Place the bulb on its side and cover with about two inches of dirt, gradually filling in the hole as the plant grows.

After the first killing frost, cut off stems to about four inches above the ground and carefully remove the roots from the ground, being careful not to break them from stalks. Store in a cool, frost-proof cellar away from the furnace where they will not become too dry.

The size of the bulb has nothing whatever to do with the quality. One the size of a peanut, if it has a good eye, will give as good a plant as one the size of a large potato. But one eye should be allowed to a bulb in dividing them.

Terms.—Cash with order unless otherwise arranged.

Assortments.—For those not acquainted with the different varieties of dahlias, we will make up a collection of one dozen tubers, no two of the same, of our own selection, all named varieties and listed in this catalog, for $5.00, $10.00 or $15.00. In each case, we will give good values and generous count.

Reference.—Riggs National Bank, Washington, D. C.

Key to Abbreviations.—C., Cactus; Dec., Decorative; H. C., Hybrid Cactus; P., Peony.

We make a specialty of growing those varieties that are best for exhibiting and last well when cut for the house. In our opinion, this constitutes two of the best assets that a flower can have. There are enough excellent varieties of this class so that a great many other varieties can be discarded. The others I have listed have merits warranting their places in this catalog.

GLADIOLI

The interest developed in the gladiolus during the past few years has been tremendous, and thousands of bulbs are now planted annually where dozens were used in the past. Their present popularity is sure to continue to increase as they are, without doubt, one of the most attractive and useful of all summer flowering bulbs, and, as a cut flower, are exceedingly fine as the spikes will last for a week or more when cut.

Bulbs should be planted from four to six inches deep, in rows about eighteen inches apart, and about four inches apart in the row or may be bedded, planting six inches apart each way. If bulbs are planted at intervals of every ten days to two weeks, from the time that ground can be worked until about the first of July, you will have flowers until frost.

Flower spikes, when wanted for indoor use, should be cut when the first flower opens. Care should be taken to leave at least four leaves on the stalk to mature the bulb. Each day the dead flowers should be removed and about half an inch of the stem cut off.

After the first killing frost, bulbs should be removed from the ground, thoroughly dried or cured, and stored in a frost proof cellar.

Assortments.—Lots of two dozen bulbs, of my selection, of named varieties listed herein, for $2.00, $3.00, $4.00 and $5.00.

Note.—All bulbs supplied are of No. 1 or blooming size. One half dozen at dozen rates. Write for prices on 100 lots.

CANNAS

Cannas make one of the finest bedding flowers we have. From the time they start to bloom until frost they are one riot of color. We grow but four varieties, and these four the best that we can find.

Four Grand Cannas that Stand Out Above All Others

King Humbert, 4 ft. This remarkable Gold Medal Canna has been the sensation the past ten years and is the greatest favorite today. Scarlet flowers with bronze foliage. Each, 25c.; doz., $2.50.

Mrs. Alfred Conard. One of the very best Cannas in commerce today. The large, exquisitely shaded salmon pink flowers are produced in great abundance. We consider this as superior to all other pink flowered Cannas. 4 ft. Each, 25c.; doz., $2.50.

The President. This immense new flaming scarlet has come into wider use more quickly than any other Canna. The color is red and the foliage is a rich green and burn proof in the hottest weather. 4 ft. Each, 25c.; doz., $2.50.

Yellow King Humbert. An orchid flowering sport of the well known King Humbert. Has the same habit of growth as its parent. Color is a deep rich yellow, softly spotted and blotched with bright red. Foliage is a very dark green. 4 ft. Each, 25c.; doz., $2.50.

Peony list will be issued in July or August.

We have a number of perennials also. If interested, send for list.
